PROFILE SUMMARY

A highly motivated third-year Computer Science student with a strong passion for developing innovative web and mobile applications. Skilled in programming languages such as Java, JavaScript, Kotlin, and frameworks like React.js and Next.js. Experienced in building scalable and user-friendly applications, including projects in e-commerce and registration systems. Enthusiastic about back-end development and artificial intelligence, with a long-term goal of establishing a tech company to create impactful solutions for society.

WORK EXPERIENCE

Freelance   2024
Mobile Application Developer

- Developed the DELYRES application, a comprehensive food buying and selling platform with 130 pages, integrating REST API for real-time server communication. Implemented the MVVM architecture to ensure scalability and maintainability.
- Created the STUDX Registration App, designed for university clubs to manage student registrations. Integrated REST API using Django for backend operations, simplifying the registration process for students and enabling efficient event tracking for administrators.
- Focused on building robust and scalable systems, ensuring seamless user experiences.
